BUILDING A STRONG CYBERSECURITY PROGRAM JUST GOT EASIER.

Gain confidence in your cybersecurity posture by taking advantage of one of Avalon's strategic, all-in-one service packages. Each plan offers world-class security solutions, delivers predictable costs, and ensures a stress-free experience while developing and maturing your organization's comprehensive security program.

Select your service plan. Calculate your costs.

Simply choose one of our fixed monthly subscription packages, which were developed with a variety of entities in mind, from small teams to highly regulated businesses. Or select a completely customizable version that includes incident response services and a virtual CISO at your disposal. Then, to automatically see estimated pricing* for each plan, use our online calculator.

Features *(See page 2 for detailed descriptions of each feature)*	**Essentials** Designed for small teams to effectively manage fundamental cybersecurity	**Enhanced** Perfect for businesses that require a comprehensive security solution	**Premium** Ideal for businesses with ambitious growth plans and a strong security focus	**Custom** Custom solutions to help businesses achieve a greater level of security

Active Open Source Intelligence Gathering

Continuous analysis of publicly available information about your organization that is commonly used by threat actors for purposes of exploiting your organization and employees.

IT Hygiene & Asset Management

Quickly dive in and explore applications, accounts, and assets using real-time data from your systems.

Managed EDR/NGAV & Monthly Roll-Up Reporting

Avalon's tested and proven robust endpoint monitoring solution screens malicious behavior at the endpoint level, allowing our team of experts to alert you and take immediate action to shut down a potential threat.

Continuous Threat Hunting - 24/7/365

Provides deep and continuous human analysis, 24/7, to relentlessly hunt for anomalous or novel attacker activity designed to evade standard security detection technologies.

Online Training & Exams

Online training to ensure your employees understand the mechanisms of spam, phishing, spear phishing, malware, ransomware, and social engineering and can apply this knowledge in their day-to-day job.

Endpoint Continuous Vulnerability Scanning

Real-time assessment of vulnerability exposures on endpoints throughout your organization.

Phishing Simulator

Deliver realistic phishing emails to your employees to gauge their awareness of attacks and indicate what to do with phishing emails when they receive them.

Dark Web Monitoring

Continuous monitoring service that searches for and tracks your organization's information on the dark web.

Perimeter Vulnerability Scanning (quarterly)

Inspection of your company's network perimeter for purposes of detecting missing patches and misconfigurations that leaves your company vulnerable to network attacks.

Live Training

An Avalon expert will provide relevant, insightful, and actionable information about cyberattacks and what other companies are doing to thwart them.

Penetration Testing (external)

Our team will safely simulate the actions of threat actors targeting your external network with the objective of gaining access to your network and systems.

Microsoft 365/G-Suite Best Practice Security Audit (annual)

Avalon utilizes several standards for its Best Practices Review, such as CIS, NIST, CISA, and Microsoft standard security/settings best practices.

Cloud Security Posture Management

Detects and prevents misconfigurations and control plane threats, eliminates blind spots, and ensures compliance across AWS, Azure, and Google Cloud.

Advanced Log Monitoring (SIEM)

Avalon manages your SIEM solution by monitoring for anomalous behaviors, customizing dashboards, building reports, and alerting to meet your security needs.

Managed Log Monitoring

To help meet compliance obligations, Avalon can help ingest log data into a SIEM for purposes of visibility, analysis, reporting, and long-term storage.

INCLUDED PROFESSIONAL SERVICES

Security Helpline

Direct, secure communication with our experts who will provide the support you need, when you need it most.

Advisory/Consultative Services

We help you build a highly resilient cyber program, while simultaneously enabling productivity and the continued success of your business.

Incident Response

Our IR professionals works collaboratively with your team to handle critical security incidents and help prevent them from happening again.

Virtual Chief Information Security Officer (vCISO)

Our experts provide support by overseeing the design, development, and integration of your cybersecurity program.
