With **advanced AI** seamlessly integrated into the **RelativityOne platform,** legal teams – or Avalon's document review experts – can **quickly identify the most relevant information** at scale.

Enhance the efficiency, consistency, and quality of your legal document review with Relativity aiR for Review. With advanced AI seamlessly integrated into the RelativityOne platform, legal teams – or Avalon's document review experts – can quickly identify the most relevant information at scale. aiR for Review highlights key documents, offering detailed rationale, insights, and citations, that enable teams to gain a comprehensive understanding of your data in less time.

Why use aiR for Review:

- **Achieve new levels of efficiency** – Harness the power of integrated generative AI to quickly and accurately analyze documents for relevance and key issues. This advanced technology delivers faster results and higher quality, offering substantial time and cost savings. It also enables legal teams to meet tight deadlines, eliminate unnecessary distractions, and prioritize strategic efforts in their projects.

- **Transparent, essential insights, at the outset** – Get insights that really matters, right at the start of a case or investigation. aiR for Review quickly locates hot documents and clearly explains their relevance, delivering vital information that's often found late in review or even missed.

- **Rapidly establish case expertise** – aiR for Review's "prompt criteria" feature enables legal teams to determine responsiveness criteria and important issues in significantly less time. Instead of spending days – or even weeks – establishing case knowledge, teams can work with aiR for Review to quickly analyze case data and fast-track the discovery of valuable insights.

- **Greater team collaboration and consensus** – Harness collective expertise and streamline the transfer of insights across your review teams with aiR for Review. This tool helps prevent knowledge gaps by offering a unified perspective on key issues, while enabling reviewers to add comments and context that can be fed back into aiR's analysis to deliver better results.

- **Quality and consistency from start to finish** – Ensure consistency and reduce production risk by using aiR for Review to compare coding decisions across documents. aiR for Review's analysis helps identify discrepancies that may result from differing opinions and quality standards in human reviews.

Use aiR for Review to:

- **Conduct first-pass reviews** – Determine what you need to produce and discover essential insights quickly and accurately.

- **Kickstart your review process** – Prioritize the most important documents to give reviewers or even train another AI tool like active learning.

- **QC traditional reviews** – Compare aiR for Review's coding predictions to decisions made by reviewers to accelerate QC and improve results.

- **Gain early case insights** – Lear more about your matter right from the start, leading to quicker, more strategic decisions.

- **Analyze productions from other parties** – Reduce effort to find important material and get it to decision makers quickly.

- **Uncover material for an internal investigation** – Find documents and insights that help you understand the story hidden in your data.

Take advantage of aiR for Review by [contacting the experts](#) at Avalon. We can get your team set up in RelativityOne or handle the entire process from data collection through document review.
